EDUCATION

Columbia University

B.S. in Computer Science

- GPA: 3.81/4.0 — Dean's List (all semesters)

New York, NY

Sep. 2024 – May 2026

EXPERIENCE

Software Engineer

June 2026 – Present

Bloomberg (Realtime Data Platform Metering Team)

New York, NY

- * My team is responsible for building **high-throughput, low-latency C++ infrastructure** that processes **2.2B+ API requests per day**, and developing resilient streaming pipelines for real-time metering, billing, compliance enforcement, and customer alerting, with a focus on scalability, data accuracy, replayability, and graceful degradation.
- * Built a daily Redis hydration pipeline to pre-populate active carryover subscriptions, preventing false access blocks for throttled clients at monthly billing resets.

Software Engineer Intern

May 2025 – Aug. 2025

Intuit

Mountain View, CA

- * Reduced **2,000+ hours** of manual review of data privacy bills by developing a full-stack **LLM-powered** legislative tracker with schema-based extraction and policy deviation detection in **Python** and **React**, launching one quarter ahead of schedule; named inventor on U.S. Patent Application **No. 19/402,877**
- * Automated monthly competitive analysis for Intuit Enterprise Suite PMs, saving **3,600 hours** and **\$288K annually**, by building a **LangChain** plan-and-execute AI agent with a custom Tavily Search wrapper in **Python**
- * Validated build-vs-buy decisions by prototyping an **LLM-based** tool in **Python** that automatically scanned PRs and created GitHub issues via API, evaluating alternatives to Semgrep
- * Informed research direction by developing a proof-of-concept Question Answering agent over **SQL** databases in **Python**

Software Engineer Intern

Jun. 2024 – Aug. 2024

Lazard

New York, NY

- * Streamlined deal research and automated repetitive tasks for **3,000+** investment bankers by building backend services and tools for Lazard's Agentic AI in **Python** utilizing **FastAPI** and **LangChain**
- * Accelerated LLM lifecycle with automated fine-tuning, evaluation, versioning, and deployment, by implementing a **GitLab** ML CI/CD pipeline in **Python** and **Shell**
- * Enhanced **Azure** Cloud deployment flexibility by improving **Terraform** IaC codebase to support dynamic cloud provisioning

PROJECTS

tickr | *Next.js, TypeScript, Supabase, Claude, Finnhub, Tavily, Vercel* | use-tickr.vercel.app

Jan. 2026 – Present

- * Built a web app that lets retail investors define their investment thesis and receive **AI-generated** trade ideas tailored to their goals, with every idea backed by cited sources
- * Designed a multi-stage **AI agent** pipeline that detects market events, enriches them with financial data and web search, and generates personalized recommendations
- * Implemented caching, rate limiting, and an audit trail to handle external API constraints and maintain full observability across pipeline runs

TECHNICAL SKILLS

Languages: Python, Java, C/C++, Go, JavaScript, SQL, HTML/CSS

Frameworks: React, Next.js, Node.js, Flask, FastAPI, Spring Boot, LangChain, LlamaIndex, JUnit/PyTest

Developer Tools: Git, Docker, Kubernetes, Terraform, AWS, GCP, GitHub Actions, Postman, Cursor, Claude Code

Libraries: Pydantic, BeautifulSoup, NumPy, Pandas, PyTorch, Scikit-learn, Hugging Face, OpenAI/Anthropic API
